I-way

BRAND GUIDELINES · V1.0

Move Smarter. Go Further.

How I-way looks, sounds and behaves, across the public website, the four applications, documents and partner materials.

INTERNAL · CONFIDENTIAL Date: October 10, 2026

Basis: I-way Brand Kit (tokens, logo, icon, concept board) and the Public Experience Directive

CONTENTS

What this guide covers

#	Section	Use it to
1	Brand foundation	Explain who I-way is and how it positions itself publicly
2	Voice and messaging	Write copy, UI text, notifications and errors
3	Logo and icon	Place the mark correctly on any surface
4	Colour	Choose colours and accessible pairings
5	Typography	Set type for web, apps and documents
6	Layout, shape, icons, imagery, motion	Build consistent interfaces and visuals
7	Components and status language	Use buttons, chips and status colours the same way everywhere
8	Product expression by application	Apply the brand to Driver, Carrier, Fleet and Platform apps
9	Public vs. private brand rules	Protect proprietary information in anything customer-facing
10	What not to use (concept-board conflicts)	Avoid claims and assets the directive prohibits
11	Applications and templates	Apply the brand to email, slides, documents and social
12	Asset inventory and governance	Know what exists, what is missing and who approves

Authority. `brand-tokens.json` and the SVG files in the Brand Kit are authoritative. Values marked **derived** were introduced for UI and accessibility and need brand-owner approval. The concept board (PNG) is inspiration, not specification.

01 · FOUNDATION

Brand foundation

Purpose

Make moving goods simpler, so businesses and the people who deliver for them spend less time coordinating and more time moving forward.

Promise

One connected experience: plan the work, see what is moving, keep everything organized.

Brand line

Move Smarter. Go Further.

Always sentence case with full stops, always as two sentences. Descriptor: “Logistics made simpler.”

Positioning (public)

A logistics platform that helps businesses plan shipments, stay informed and keep deliveries organized. Say *what customers can do*, never *how the technology works*.

Personality: four pillars

Effortless

Few steps, plain words, no clutter.

Trustworthy

Verified claims, visible status, honest limits.

Forward-moving

Direction, momentum, progress, never hype.

Approachable

Professional, human, never stiff.

Audiences

Audience	What they need from the brand	Where they meet it
Businesses that ship goods	Clarity, confidence, less chasing	Public website, notifications, tracking links
Carriers, dispatchers, accounting	Control, accuracy, speed	Carrier Admin Portal
Drivers	Glanceable, one-handed, no ambiguity	Driver Mobile App

Fleet companies	Ownership of their fleet and pay	Fleet Company Portal
I-way staff	Governed visibility	Platform Admin (internal)

Brand note on “AI”. The product is described internally as AI-native. Publicly, I-way does not lead with AI, show AI mechanics or use AI-themed imagery. The directive asks for outcomes, not mechanisms, and warns against generic AI imagery and buzzwords.

02 · VOICE AND MESSAGING

Voice and messaging

Clear
Short sentences. Everyday words. One idea at a time.

Confident
Promise only what we can verify.

Warm
Talk like a capable colleague.

Honest
Say what is available now and what is not.

Say / don't say

Instead of	Write	Why
Leverage AI-driven orchestration to optimize your supply chain	Plan shipments, stay informed, and keep your business moving with confidence.	Outcome, not mechanism
Trusted by the world's biggest brands	*(omit until real, approved customers exist)*	No fabricated social proof
Cut costs by 28%	*(omit unless substantiated and approved)*	No unsupported statistics
Error 500: request failed	We couldn't send that just now. Your details are still here. Please try again.	Calm, specific, recoverable
Sign up now, limited spots!	I-way is opening through early access. Tell us about your shipments and we'll be in touch.	No false scarcity

Tone by context

Context	Tone	Length	Example
Public website	Confident, simple, outcome-led	Headline ≤ 8 words; paragraphs ≤ 2 lines	Ship with confidence.
Product UI (Carrier, Fleet)	Precise, neutral, action-first	Labels 1–3 words	Assign driver
Driver app	Direct, imperative, glanceable	One line per instruction	Confirm arrival
Notifications	Factual, timely, specific (what, which load, what next)	≤ 2 lines	Pickup confirmed · IW-1021
Errors and empty states	Calm, blame-free, say what to do	2 sentences	Nothing here yet. Create your first shipment.

Legal and finance	Plain and exact; no marketing language	As needed	Settlement approved · PDF ready

Vocabulary

Prefer

shipment (to shippers) · load (in carrier and driver tools) · delivery · plan · confirm · update · status · documents · early access

Avoid

leverage · synergy · revolutionary · cutting-edge · best-in-class · guaranteed · seamless as a claim · “AI-powered” as a headline · superlatives without proof · exclamation marks in UI

Approved messaging blocks (public)

Block	Copy
Headline	Move Smarter. Go Further.
Subheadline	Logistics made simpler. Plan shipments, stay informed, and keep your business moving with confidence.
Benefits	Ship with confidence · Stay informed at every step · Spend less time coordinating · Keep deliveries organized
How it works	01 Tell us what you’re moving · 02 Plan your delivery · 03 Stay connected
Closing line	Ready to move smarter? A simpler logistics experience starts here.
Boilerplate (short)	I-way is a logistics platform that helps businesses plan shipments, stay informed about progress, and keep deliveries organized in one place. It is currently opening through early access.
CTA labels	Get Started (primary) · Explore I-way (secondary) · Sign In · Join early access

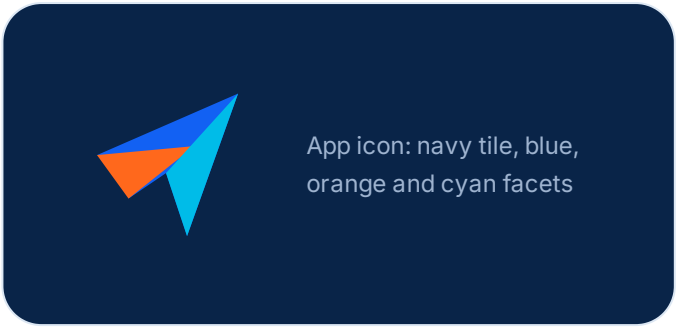

Taglines. “Move Smarter. Go Further.” is approved. “Smart Logistics. Greater Possibilities.” appears as a descriptor in the concept board; use only after the owner confirms it TBC. “AI-Powered Logistics for a Connected World” and “Your Cargo. Our Intelligence.” conflict with the public/private rule and are **not approved** for public use.

03 · LOGO AND ICON

Logo and icon

Use the supplied SVG files exactly as provided. Do not redraw, recolour, re-space or re-typeset them.

Asset	File	Details
Primary logo	i-way-logo.svg	viewBox 360×110 · mark in Blue #1261F3, Orange #FF681C, Navy #092448 · wordmark “I-way” in Navy, extra-bold
App icon	i-way-icon.svg	viewBox 128×128 · Navy tile, corner radius 28 · mark in Blue, Orange, Cyan

Clear space and size

Rules

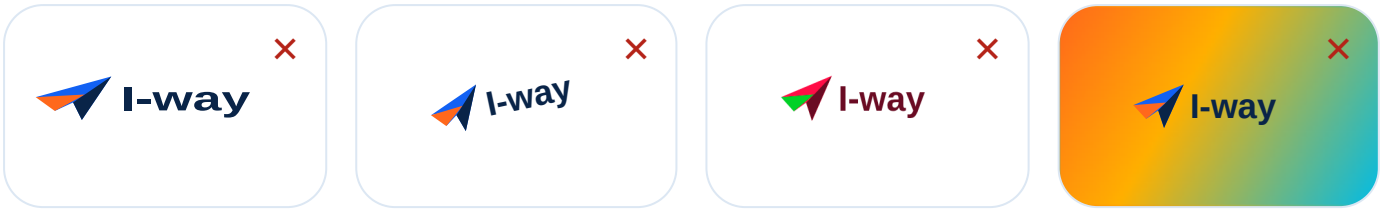

- **Clear space X** = ¼ of the logo height on every side. Nothing enters this zone.
- **Minimum size:** logo 96 px wide on screen (25 mm in print); icon 24 px (16 px for favicons only).
- **Placement:** top-left in headers; centred only on single-focus pages.
- **Icon alone** for app tiles, favicons, avatars. Never use the icon where the wordmark is needed for recognition (first impressions, press).

Backgrounds

White and Cloud: use the primary logo. Navy or photographic backgrounds: place the primary logo on a white chip (as in the website footer) until an official reversed (white) logo is supplied. Do not invert or filter the logo to make it white.

Misuse

Do not: stretch or squash · rotate or skew · recolour or apply gradients · place on low-contrast or busy backgrounds · add shadows, outlines or effects · rearrange mark and wordmark · re-typeset “I-way” · crop the mark · use as a letter inside a sentence · place a third-party logo inside the clear space.

Production note. The supplied logo draws “I-way” as live text in Arial. Viewers without the same font fall back to another face. Before print, packaging or vehicle livery, request an outlined (text-to-path) version of the logo so the wordmark never changes. TBC

04 · COLOUR

Colour

Navy

#092448
RGB 9 · 36 · 72
Text, headers, dark surfaces

Blue

#1261F3
RGB 18 · 97 · 243
Links, interaction, emphasis

Cyan

#00BCE8
RGB 0 · 188 · 232
Tracking and data accents

Orange

#FF681C
RGB 255 · 104 · 28
Primary action, movement

Amber

#FFB000
RGB 255 · 176 · 0
Highlights, warnings

Cloud

#F5F8FC
RGB 245 · 248 · 252
Backgrounds

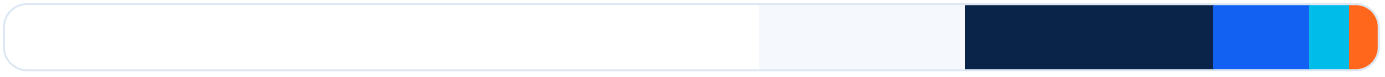

Ink

#111827
RGB 17 · 24 · 39
Body text on light

White

#FFFFFF
derived
Cards and surfaces

Proportion

Guide, not a formula: White/Cloud and Navy carry roughly 85–90% of any layout. Blue guides interaction. Cyan marks tracking and data. Orange appears **once per view** as the main action or a single movement accent. Amber is for warnings and highlights.

Accessible pairings (WCAG contrast, computed)

Foreground	Background	Ratio	Use
Navy	White	15.5 : 1	All text
Ink	White / Cloud	17.7 / 16.7 : 1	All text
Blue	White / Cloud	5.2 / 4.9 : 1	Text and links
Navy	Orange	5.3 : 1	Button label on Orange
Navy	Amber	8.4 : 1	Label on Amber
Cyan	Navy	6.9 : 1	Text on dark

White	Blue	5.2 : 1	Text on Blue
White	Orange	2.9 : 1	Fails: do not use
Orange	White	2.9 : 1	Not for text; graphics only
Cyan	White	2.2 : 1	Not for text on light
Amber	White	1.8 : 1	Not for text on light

Derived UI colours

derived · pending approval

Success
#0B7A4B on #E3F6EC
4.8 : 1

Warning
#8A5300 on #FFF3D6
5.7 : 1

Error
#B42318 on #FDECEA
5.8 : 1

Info
#1E40AF on #E0EAFF
7.2 : 1

Also derived: muted text #475569 (7.6 : 1 on white), border #DCE7F3, dark panel tones #12396F and #0F2F5C for map and hero surfaces. Colour is never the only carrier of meaning: status always pairs colour with a word or icon.

05 · TYPOGRAPHY

Typography

Aa

Inter

Primary typeface for every surface. Weights: 400, 500, 600, 700, 800. Open-source (SIL OFL). Fallback: system-ui, Segoe UI, Roboto, Arial.

Type scale (web)

Display 42–76 / 1.06 · 800	**Move Smarter.**
H1 34–56 / 1.1 · 800	**Get started with I-way**
H2 30–44 / 1.1 · 800	**Three simple steps**
H3 20 / 1.3 · 700	**Stay informed at every step**
Lead 18–21 / 1.65 · 400	Plan shipments, stay informed, and keep your business moving with confidence.
Body 17 / 1.6 · 400	Follow shipment progress and receive relevant updates.
Eyebrow 13 · 800 · caps +0.14em	HOW IT WORKS
Button 16 · 700	Get Started

Rules

- Headlines: tight tracking (−0.02em), extra-bold, Navy. Sentence case, never all caps except eyebrows.

- Body line length 45–75 characters. Left-aligned. Avoid justified text.
- Numbers in tables, settlements and invoices use tabular figures (`font-variant-numeric: tabular-nums`) and right alignment.
- Product UI: 14–16 px body in dense portals; 18 px minimum body in the Driver App, primary button label 18–20 px bold.
- The supplied logo wordmark is Arial-based artwork; it is not typeset in Inter. Never retype it.

06 · LAYOUT, SHAPE, ICONS, IMAGERY, MOTION

Layout, shape, icons, imagery and motion

Shape

Cards 20 px radius · buttons 12 px · fields 10 px · chips fully rounded. Soft, friendly, never sharp.

Spacing (4-pt grid)

4 · 8 · 12 · 16 · 24 · 32 · 48 · 72 · 104. Generous whitespace between sections (64–104 px), tight inside components.

Elevation

Shadow 1 `0 8px 24px rgba(9,36,72,.06)` for cards. Shadow 2 `0 24px 60px rgba(9,36,72,.14)` for hero and floating elements. No hard black shadows.

Iconography

One family: 24 px grid, 1.75 px stroke, round caps and joins, single colour (`currentColor`), shown in a 44–52 px tile (radius 12–14) with a soft tint of its colour. Do not mix filled and outline icons, emoji or third-party icon styles in one interface.

Imagery and illustration

Do

- Original, clean logistics illustrations in brand colours
- Interface previews with sample data labelled “illustrative”
- Authentic photography only if owned or licensed, showing real work, people and vehicles without other brands
- Route lines, pins, parcels, trucks as simple geometric forms

Don’t

- Generic “AI” imagery: brains, circuits, robots, glowing networks
- Third-party brand logos or liveries (carriers, retailers, ports)
- Crowded dashboards or technical diagrams on public pages
- Stock images that imply customers, scale or coverage we cannot verify

Motion

Subtle and purposeful: 150–200 ms for interactions, up to 600 ms for gentle reveals, route-line dash and a slow float on hero cards. Everything stops under `prefers-reduced-motion`. No autoplay video, no parallax, no animation that carries essential information.

Data visualisation

Primary series Blue; secondary Cyan; highlight Orange (one series); warnings Amber; neutrals from Navy tints. Always label directly or in a legend with text; never rely on colour alone.

07 · COMPONENTS AND STATUS LANGUAGE

Components and status language

Buttons

Get Started | Explore I-way | Approve settlement | Sign In

One Orange primary action per view. Orange buttons always carry Navy text. Secondary = Navy outline. Minimum height 44 px (48 px default, 56 px hero, 52 px Driver App primary).

Status chips (colour + word)

Draft | Unassigned | Assigned | In transit | Delivered | Completed | Needs information | Exception

Meaning	Colour	Statuses (from the status architecture)
Not started / neutral	Grey	Draft, Inactive, Closed
Needs attention	Amber	Unassigned, Under Review, Expiring Soon, Needs Information, Pending
In progress	Blue	Assigned, Accepted, En Route, At Pickup, Loaded, In Transit, At Delivery
Done / good	Green	Delivered, POD Submitted, Completed, Approved, Paid, Active
Problem	Red	Rejected, Expired, Failed, Returned, Suspended, Exception

Forms and feedback

- Visible label above every field; optional fields marked “(optional)”; required kept to a minimum.
- Errors sit under the field in red text with a clear fix; inputs persist after errors; focus moves to the first error.
- Loading states say what is happening (“Sending…”). Success states say what happens next.
- Focus ring: 3 px Blue, 3 px offset, on every interactive element.

08 · PRODUCT EXPRESSION

Product expression by application

One brand, four densities. Tokens are identical; layout density and target sizes change.

Application	Character	Density and targets	Notes
Public website	Premium, airy, persuasive	Generous space; 48–56 px buttons	Customer outcomes only; sample data labelled
Driver Mobile App	Calm, bold, glanceable	18 px body; 52 px primary action; one task per screen	Works with gloves and sunlight: high contrast, large status text
Carrier Admin Portal	Efficient, information-rich	14–16 px; tables with tabular numbers	Navy sidebar, Cloud canvas, white cards
Fleet Company Portal	Same as Carrier, clearly separate context	As Carrier	Show company name in header so users know whose data they see
Platform Admin	Sober, audited	Dense; destructive actions need confirmation and reason	Internal only; never shown or named publicly

Prototype alignment. The Make prototype uses a dark amber theme from an earlier style-guide proposal. It must be re-themed to these tokens. A dark mode may be added later with Navy surfaces and Cloud text; dark-mode tokens are not yet defined TBC.

09 · PUBLIC VS. PRIVATE

Public vs. private brand rules

Brand expression must never leak how I-way works. Show the customer-facing outcome, not the proprietary mechanism.

Public (website, social, press)	Private (documents, apps, repositories)
What I-way helps customers do	How the technology accomplishes it
Simple shipment experience	Internal shipment orchestration
Tracking and visibility	Data processing and intelligence models
Customer benefits	Proprietary algorithms
Easy registration	Identity and permission architecture
Clear pricing, when approved	Pricing algorithms and margin models
Customer trust	Internal security architecture

- Never in public brand material: strategy, roadmap, agent or AI mechanics, architecture, algorithms, settlement rules, margins, ownership model, Platform Admin, internal metrics.
- Brand assets in the public repository carry no internal names, comments or metadata.
- Every public asset passes the IP-disclosure review before release.

10 · WHAT NOT TO USE

Concept-board conflicts

The supplied concept board (`i-way-brand-and-landing-preview.png`) is useful for logo variations, icon directions and mood, but its sample landing page contradicts the directive. Treat these items as **not approved**.

Concept-board element	Problem	Decision
“Trusted by businesses worldwide” with major carrier, retailer and port logos	Fabricated social proof; third-party trademarks	**Remove**
Statistics: −28% cost savings, 98% on-time, 1,248 shipments, $24.5K	Unsupported performance claims	**Remove** (sample data only if labelled illustrative)
“AI-native”, “AI route optimization”, “How does the AI optimization work?”	Reveals mechanism; AI buzzwords	**Remove**
“Get Started Free”, “Is there a free trial?”, Pricing nav item	Unapproved commercial claims	**Remove** until pricing approved
Global coverage, airplane, ship and container imagery	Implies reach not verified; off-scope for a trucking-led product	**Remove**
Industries: Healthcare, Automotive, Energy & Industrial	Not in the approved list	Use: retail, e-commerce, manufacturing, distribution, growing businesses
Newsletter, social links, © 2024	Unconfigured or outdated	Add only when approved; use current year
Truck livery showing the I-way mark	Concept only	Do not publish without a real, approved vehicle program
Logo variations: reversed, mono, tagline lockup; app-icon colour variants	Useful direction, but no production files supplied	**TBC** request official SVGs
Palette labels printed in the board	May differ from tokens	`brand-tokens.json` wins

11 · APPLICATIONS AND TEMPLATES

Applications and templates

Item	Guidance
Favicon / app icon	Use i-way-icon.svg. Export PNG sizes (16, 32, 180, 192, 512) from the SVG without changes TBC files
Email signature	Logo ≥ 120 px wide left; name, role, phone, email in Inter or Arial 13 px Navy; no banners, quotes or images
Presentations	White or Navy title slide, one Orange accent, Inter, 28 px minimum body, labelled sample data
Documents (PRD, BRD, reports)	Navy headings, Blue sub-headings, Navy table headers with white text, “INTERNAL — CONFIDENTIAL” on every internal document
Social profile	Icon as avatar; Navy cover with brand line; post only approved claims
Social/OG image (1200×630)	Navy background, white chip with logo, brand line in Inter 800
Notification emails	White card on Cloud, logo top-left, one Orange button, plain-language subject, no marketing in transactional mail
PDFs (statements, invoices, BOL/POD)	Logo top-left, Navy headings, tabular figures, carrier name and address as the issuer where the carrier issues it

12 · ASSETS AND GOVERNANCE

Asset inventory and governance

Asset	Status	Note
Primary logo SVG	Supplied	Outline wordmark before print
App icon SVG	Supplied	
Brand tokens (JSON)	Supplied	Extended in docs/brand/tokens (kit vs. derived labelled)
Concept board PNG	Reference	See section 10
Reversed (white) and one-colour logos	Needed	Concept shown; no files
Logo with descriptor line	Needed	Descriptor wording TBC
Favicon and app-icon PNG set, app-icon colour variants	Needed	
Outlined wordmark	Needed	Print, vehicle, packaging
Social avatar, OG image, email signature, slide and document templates	Needed	Specs in section 11
Illustration and photography library	Needed	Original or licensed only
Trademark status of name and logo	TBC	Legal; do not add ™/® until confirmed
Inter font	Open licence	Self-host; include licence file

Governance

Topic	Rule
Brand owner	To be named TBC
Using the brand	Use the supplied files and tokens unmodified; never recreate from screenshots
Requesting new assets or exceptions	Written request to the brand owner with use case and mock-up; exceptions recorded in the change log
Public release	Public copy and assets pass `docs/IP_DISCLOSURE_REVIEW.md` and `npm run verify`

Partners and vendors	Receive this guide and the Brand Note; no use of the mark without written approval
Versioning	Semantic: v1.0 foundation; update on any token, logo or rule change
